Seeking position as a...

## Software Engineer w/ focus on Front-End Development

A computer science professional capable of managing technology projects from conception to completion with remarkable deadline sensitivity and with a strong sense of aesthetics and attention to details. Strong analytical skills combined with experience in object oriented programming and graphic design techniques allow me to solve complex design and development issues. I am a compatible team player willing to tackle tasks though out various stages of the project cycle, testing, and final implementation. I excel in team collaboration, solution brainstorming, and ideation sessions.

## Technical Skills

**Platforms:** Mac, Linux, Unix, Windows

**Languages:** Javascript, CSS, HTML, JSP, PHP, Perl, Python, XML, Ruby, Java, C, C++, Objective-C

**Frameworks:** Spring, Django, Ruby on Rails, Zend, Drupal, Wordpress, Bootstrap, HTML5 Boilerplate

**Tools:** GIT, SVN, Yeoman, Grunt, Bower, Maven, Ant, Apache Web Server, Apache Tomcat, Jira, Homebrew, Node, NPM
